

# MODEL D-60 ATEX Multi-Pail Wash System

RotaJet batch pail washing machines are made to be used with low flash point flammable solvent. Dirty containers are loaded into the machine, the door is closed and cycle started.

The cleaning process is fully automated, and the drums are washed, rinsed and dried, ready for production. Systems are perfect for paint, ink and printing companies.

## Features Include:

- automatic wash, rinse and dry cycle
- high volume vapor extraction system protects operator prior to door opening
- solvent spray pressure at 4-6 Bar, 87 PSI max
- short cycle times - only 12 minutes!
- easy integration into full-scale solvent recovery systems
- ATEX certified
- rated Class 1, Division 1, Group D

## TECHNICAL OVERVIEW

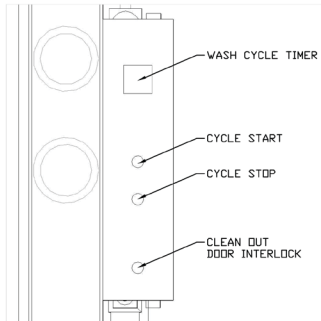

Max Load	992 lbs
Max Component Height	30.3 in
Wash Sump Capacity	198 gal
Material of Construction	6 gauge mild steel
Pump Size	(2) 1.5" air diaphragm
Bottom Spray Bar Drive Detail	Fluid
Air Inlet Pressure	87 PSI Max
Pump Air Consumption	60 m3/hr (each)
Loading Height	33.8 in
Max Internal Pump Pressure	65 PSI
Max Cycle Time	12 min
